(54) Title: METHOD AND SYSTEM FOR RENDERING READ-ONLY STORAGE MEDIUM VIRTUALLY RE-WRITABLE

(57) Abstract: A method (1,2) of and system (3) for rendering a removable read-only storage medium (30) virtually re-writable by providing a unique medium identifier (43) for the read-only storage medium (30) and by providing a link to a networked storage area of a mass storage device, wherein access to said storage area is granted by said medium identifier. According to one embodiment access to said network storage area is limited to a restricted area, wherein the writable option only works within the restricted area. According to another embodiment, a Blu-Ray ROM disc is linked to user-specific contents on a network storage device. This allows the Blu-Ray ROM disc, being identified by a unique medium identifier, e.g. based on a barcode in the Burst Cutting Area (42) of the disc, to have an identical user defined behaviour on arbitrary players connected to the network.
